

## DEAL FINALLY CLOSED

**Bully Boy & Webster Mine at Marysville Is Sold.**

**PRICE ABOUT \$150,000**

**BULLION-BECK TUNNEL SUIT AGAINST LA REINE DROPPED.**

This leaves latter company free from litigation and in shape to get patent—diamond drills for the Overland—Centennial-Eureka Money May Not Come Before Dec. 30.

The negotiations for the sale of the Bully Boy & Webster gold mine at Marysville were formally consummated yesterday. The papers in the transaction were signed and the control of the property passed to J. A. Odert, William E. Holderman and Milton Packard, the vendors being R. C. Chambers, J. B. Haggin and the Hearst estate.

None of the interested parties would state the consideration, but it was reported that the amount was not far from \$150,000.

One of the conditions of the agreement made with Mr. Chambers and his associates is the purchasers bind themselves to perform at least \$1,000 worth of development work during the next year. Mr. Holderman will have the superintendency of the mine and will leave today to start a force of men to work. Exploitation are to be pushed during the winter and by spring it will be in shape for a mill, which is to be built by that time.

Mr. Odert will leave for his home in Lincoln, Neb., today and will return shortly to give his attention to his Gold Mountain interests.

**BULLION-BECK TUNNEL QUILTS.**

**Withdraws Its Suit Against the La Reine Company.**

The attorneys for the plaintiffs in the suit brought sometime ago by the Bullion-Beck Tunnel company against the La Reine Mining company withdrew their case yesterday without going to trial.

The La Reine company undertook to secure a patent for the Mahogany mining claim. The Bullion-Beck Tunnel company claimed to have a title to at least a portion of the ground, and on the final day of the advertising done by the La Reine filed a protest in the office against the issuance of the patent to the defendant. The case was set for trial in December, but the plaintiffs' attorneys have withdrawn the suit.

The withdrawal of the case leaves the La Reine free from litigation and nothing stands in the way of the patent from the United States land office. Upon the receipt of the patent the plaintiff's attorneys have withdrawn the suit.

**MR. GRAHAM GOES HOME.**

**Is Well Pleased With His Investments at Bingham.**

Charles E. Graham of New Haven, Conn., will leave for home this morning, after remaining here for several weeks to look over the interests of the Bingham & Eastern Copper Mining company, which has undertaken the development of the Jersey Blue group at Bingham.

Mr. Graham goes home highly pleased with his Utah investments and carries the report to his eastern associates that the property is certain to open into an enormously large producer. Since the present company took up the proposition, a couple of months ago, the property has been pushed on the Little Cottonwood tunnel. Very encouraging results have been obtained and Mr. Graham said yesterday he was expecting to hear any day that the tunnel has cut into a rich body of ore.

**TO PROSPECT OVERLAND.**

**Huge Diamond Drills to Be Used—Captain De Lamar's Plan.**

De Lamar, one of the Boston representatives of the Gill & Peyton syndicate, left yesterday for home, after spending several days in looking over the Overland and Chloride Point mines at Mercur and the Pienle in Tintic. Mr. Blanchard spent the most of his time while in the camps sizing up conditions at the Overland, where extensive improvements are contemplated.

On his return to the city he held several conferences with his Salt Lake associates, during which a plan of action was mapped out. Just what was decided upon is not known definitely to outsiders, and when asked to give some information on the subject yesterday Mr. Peyton refused to do so. It has leaked out, however, that it was decided to follow Captain De Lamar's mode of prospecting, that is, to use the Overland to thoroughly prospect the ground to definitely determine the extent of the ore zones preparatory to the enlargement of the present mill. There is no doubt that before the close of another year the Overland will be the scene of some mammoth operations.

There is little question about the ore bodies beneath the surface of the Overland being enormous, and to make a success of the project the ore must be handled on a large scale, similar to the method employed at the Golden Gate and Mercur mines. The Overland mill is enlarged it will have a capacity of at least 800 tons daily, while it is asserted by some that by the time the plant is completed it will be capable of handling 1,000 tons every twenty-four hours.

**ORIZABA MINE FIRED.**

**A Formation of Serpentine Discovered Recently.**

A fine lot of ore samples was received yesterday by E. O. Lee and H. E. Booth from the Orizaba mine in the Antelope or Mineral range mountains, to the east of Black Rock, in Millard county. The samples were sent up by P. E. Bostwick, one of the locators of the ground. No assays of the rock have been made yet, but their appearance indicates they carry encouraging values in gold and copper, while on one part of the property there is a favorable showing of lead.

The Orizaba company was incorporated last spring, the basis of the incorporation being nineteen claims. Development work has been in progress for some time under the direction of Mr. Bostwick, and the results of his labors have been so favorable the company has decided to continue the exploratory work as rapidly as possible, and a force of men is preparing for the winter campaign by erecting several comfortable buildings. A whim is about to be purchased and will probably be forwarded to the mine by the end of the present week. The Orizaba property is located on the west slope of the mountains, about 800 feet above the valley. The croppings on the surface and the subsequent developments show the ore to lie in a contact vein between blue and brown tuff; the width on the surface, so it is stated, being from twenty to fifty feet. Assays taken from ore extracted from the present workings show values of 18 per cent copper, \$2 to \$6 in gold, with some lead. A shaft has been sunk to a depth of sev-

enty feet, which is to be carried to the 300 level before drifting. A rare discovery was made a few weeks ago in finding a serpentine formation. Serpentine is the hanging wall rock of the "mother lode of California," and is the gold and silver ore, which is owned by Eben Smith of Denver in Josephine county, Oregon.

Jasper quartz has also been found in the Orizaba claims, similar to that so common in Cripple Creek, and the Transvaal and also in Amador and Calaveras counties, California, the combination of serpentine rock and Jasper quartz are the main features, indicative of strong gold ledge. The finding of serpentine in the property is probably the first in Utah, at least well informed mining men say there has been very little, if any, ever discovered in this state before. The lead ore, Mr. Lee stated yesterday, is found in a line apart.

**CENTENNIAL-EUREKA PAY.**

**Believed It Will Not Be Made Until Last of December.**

The story printed in yesterday's Herald about the enforced retirement of Charles H. Cole from the directory of the United States and Centennial-Eureka corporation was a subject for discussion among former stockholders in the Centennial-Eureka company. The board of directors of the old Centennial-Eureka corporation were scheduled to hold a meeting yesterday afternoon. It was expected the news would come before the meeting was called to order that the remaining \$504,000 due on the block of \$500 shares of the old corporation stock—now in escrow—McCormick & Co.'s bank—was paid and the stock released. When Mr. Holden was here a few weeks ago he expressed the opinion that the money would be here by this time, and the directors would then have the opportunity to perform their last function by formally transferring the Tintic property to the new corporation. No intelligence being received from the eastern purchasers, the directors again adjourned their meeting until Saturday, Dec. 2.

Some of those interested in the \$500 block have given up hope of receiving what is coming to them before the expiration of the contract, which is Dec. 31. They are of the opinion that the trouble between Mr. Cole and his associates resulting in his leaving the presidency of the Globe National bank of Boston, as well as the directory of the United States and Centennial-Eureka, is the cause of the delay in winding up the old company's affairs.

**SALE OF THE HORNET.**

**The Gold Coin Company Pays Cash to Get It.**

Yesterday the Gold Coin Mining company of Mercur made a most important purchase of mining ground, having closed a deal whereby it becomes the owner of a two-thirds interest in the valuable claims known as the Hornet mine, and the deal was made for cash. The purchase covers a large tract of land, making its total area of ground about 2,112 acres, embraced in sixteen claims, thirteen of which are owned by the Gold Coin Mining company. The deal was secured from Charles H. Schue, Arthur Murphy, I. A. Earles, J. T. McHugh and D. E. Murray, the latter of Boston, and the deal was made for cash. The price could not be definitely learned, but it is understood to be on a basis of \$15,000 for the whole.

The possession of this ground brings the Gold Coin company's territory within 600 feet of the most valuable portion of the ground embraced in Captain De Lamar's great gold producer, and the deal was made for cash. The company will begin the opening up of its new addition at once and he will be on the ground for that purpose next week.

**COMPANIES INCORPORATED.**

**Local Capital Interested in Bingham and Duck Creek Mines.**

For the purpose of developing the Gray Eagle, North Star and Morning Star mining claims, situated in Duck Creek district, Nev., the Lead King Mining & Development company was incorporated in this city yesterday. The authorized capital stock of the company is \$50,000, divided into 10,000 shares. Mr. B. Lloyd is president, J. C. Kinkaid, secretary and treasurer, the other directors being J. P. Brim and E. A. Druehl.

With a capital stock of \$50,000 in 10,000 shares, the Louise S. Mining company was organized in this city yesterday to develop the Hattie G. the Suede S. and two-thirds of the St. James No. 2 mining claims, situated in West Mountain district. Willard F. Snyder is president; John W. Foote, vice president and treasurer; David R. Gill, secretary. The directors being, besides the president and vice president, Willard D. Thompson, E. W. Garretson and George E. Chandler.

**THAT NEW SMELTER.**

**Manager Jones Says the Story Is "All Rot."**

A contemporary went into "high-strikes" yesterday morning over the new 20,000-ton smelter which it is getting ready to erect for the American Smelting & Refining company—this plant being one of the half dozen or so which it has built during the last ninety days. Questioned regarding it yesterday, Manager T. H. Jones characterized the story as "all rot." About the future intentions of his company he said he knew nothing and consequently had nothing to say. Regarding the \$100,000 worth of "surplus ore" which was reported to have on hand with no means of treating unless another smelter was built, Mr. Jones said it was true that he now had some surplus ore, but before the winter was over he would have used up every pound, without even putting into commission the smelter smelter, a plant which his company owns, and which it has as yet been deemed unnecessary to use.

**WEEK'S METAL OUTPUT.**

**Banks and Other Buyers Handle \$327,625 Worth.**

The week's business among the ore, bullion and cyanide buyers foots up to good proportions again this week. The total ore and bullion settlements amounted to \$314,625, while gold and silver amounted to \$13,000, making a total of \$327,625. Aside from this 120,000 pounds of copper was shipped by the Highland Boy smelter and the Golden Gate (De Lamar) mill at Mercur must also have sent to market somewhere in the neighborhood of \$50,000 worth of gold and silver, making a total of \$377,625. The actual amount of business done from all sources must have sent the total over the \$400,000 mark.

**EXPERTS AT THE ONTARIO.**

**Examining the Outcrop of Vein Preparatory to Testifying.**

Colonel Wall, W. A. Wilson and Martin K. Harkness are at the Ontario mine, Park City, making an examination of and tracing the croppings of the Ontario vein, preparatory to taking a hand in the approaching suit of the Crown Point against that company. The gentlemen have gone out at this time in order to make their examinations before the snow becomes deep to get at the Superintendent R. C. Chambers said yesterday he did not expect to see the case called before January.

**BOSTONITES LEAVE TOWN.**

**Will Undertake to Develop Idaho Mining Property.**

The party of Boston people consisting of Alfred A. Glasier, W. B. Hastings and William Ferguson, who have

been at the Knutsford for several days, took their departure for California yesterday after being in consultation for several days with Phil Shanon, the well known mining man of Salmon, City, Idaho. Mr. Shanon also took his early departure for home yesterday, accompanied by Max Boehmer, the eminent Colorado expert. It is stated unofficially that during their stay in the city some understanding was reached towards the formation of a corporation to undertake the development of a large mining project in the Blackbird district, Idaho.

**Tintic Notes.**

**(Special Correspondence.)**

Robinson, Nov. 18.—The following persons visited the Tintic district this week: Colonel E. A. Wall, B. D. Luce, R. Craig Chambers, Salt Lake; David Evans, J. S. Free, A. L. Williams, O. Speers, Dr. Orem, Salt Lake City; J. W. Kidwell, B. W. Warner, Kansas City; C. M. McMahon, C. M. Cooper, St. Louis; J. H. Whalen, Thomas Wells, Lloyd T. King, Michael Kopp, M. R. Hunt, F. W. Penfold, J. H. Siegel, P. Mulrooney, Pat Condon, George W. Silks, W. H. Stevenson, George B. Douglas, Salt Lake; Lafayette Holbrook, E. L. Wadsworth, C. E. Spelman, Eureka; E. J. Pratt, San Francisco; J. F. Spelman, New York; S. S. Jones, Provo; T. R. Cutler, W. E. Rucker, Lehi.

E. G. Pickley, Chicago; Alex. Penahuna, C. H. Ensign, John Evans, E. H. Evans, Salt Lake, and D. B. Cronin were quartered this week at the Kirkland hotel.

A grand masquerade ball was given at Hansell's hall Tuesday evening, which was attended by many folks from all over the district. Some very pretty and odd costumes were worn. The hall was literally packed.

Mrs. J. C. Kirkland entertained the Ladies' association at the Kirkland home in the Kirkland hotel, Mrs. D. O. Miner, Mrs. George Robertson, Mrs. J. H. Walker, Mrs. C. H. Cody, Mrs. Isaac E. Diehl and Mrs. Festus Foster were present. The ladies were served, after which the guests took part in a quilting.

Mrs. H. F. Mitchell, wife of Frank Mitchell, lawyer at the Parrot mill, left for a visit to her mother at Provo this afternoon.

A big boy baby came to the home of Mr. and Mrs. Joe Hill of Mammoth last night. Mr. Hill is the director of the statement that the boy would seem almost as large as Joe, if he didn't think himself bigger than McKinley and Dewey.

**Iron Blossom Incorporation.**

**(Special Correspondence.)**

Mammoth, Nov. 18.—The bare statement made by the Salt Lake dailies on Thursday concerning the filing of the incorporation papers of the Iron Blossom Consolidated Mining company of Tintic did not convey the importance of the transaction to the average reader. Briefly told, the company has absolute title to five claims, to-wit: The Iron Blossom, Excelsior, Wild Winter, Little Chief and Little Giant. All of the territory lies inside the boundaries of the Boston & Wolf claims. The last named property joins the Carls and some years ago was quite a successful shipper of profitable lead and silver. The property is believed to be a very close one, and half of the treasury stock has been purchased by Omaha and Kansas City parties.

The possession of this ground brings the Gold Coin company's territory within 600 feet of the most valuable portion of the ground embraced in Captain De Lamar's great gold producer, and the deal was made for cash. The company will begin the opening up of its new addition at once and he will be on the ground for that purpose next week.

**BOSTONITES LEAVE TOWN.**

**Will Undertake to Develop Idaho Mining Property.**

The party of Boston people consisting of Alfred A. Glasier, W. B. Hastings and William Ferguson, who have

illustrations of the Red Wing mine at Bingham.

Harry B. Cole, the stock broker, is in Denver.

The Horn Silver marketed two cars of ore yesterday.

The Acme of Bingham marketed two cars of ore yesterday.

Ed Loose of Grand Central fame was in the city a few hours yesterday.

The South-Business reported at the samplers with five cars of ore yesterday.

A shipment of high-grade ore from the Colorado Point mine will be in the market on Monday.

Over 15,000 shares of Daisy stock was curved yesterday at figures ranging from 39 up to 45 cents.

Manager George A. Lonsberry of the Dyer mine, near Vernal, arrived at the Knutsford yesterday.

Superintendent H. G. Hedron went out to the Bingham Copper & Gold company's property again yesterday.

Judge Morris Sumner will go to Park City tomorrow for the purpose of forming another mining company.

Surveys have been completed on the ground of the Pioneer Mining company for some amended locations.

It was stated at the Tintic office yesterday that the Tintic Creek valley is being delinquent on the 1st assessment.

The Conklin sampling works reported the arrival of two cars of ore from Tintic and one from Deer Creek yesterday.

The Taylor & Berton sampling works received five cars of ore from Tintic, two from Frisco and two from Bingham yesterday.

J. S. Mitchell, superintendent of the Lion Consolidated mine, reported that the Lion Consolidated mine was in the market yesterday. It averaged 41.3 per cent lead and 49 ounces silver.

Mercur Mercury: Sinking the main shaft continues at the Malvern and the force will be increased as soon as the shaft is deep enough.

Mercur Mercury: Work is being pushed ahead at the Glenoco, and marked improvement in the character of the ground leads Superintendent Raddatta to believe that he will soon be in bonanza.

The new Mammoth reported at the gold sampling works yesterday that 100 pounds of cyanide which it is thought will bring \$200. Chloride Point also deposited 300 pounds of recently quota of some 300 pounds.

Mr. J. E. Bamberger declines to discuss Mammoth at the Parrot mill, which was taken by him on Sept. 20, and which expires tomorrow. The gentleman said that he will be willing to talk, but as long as nothing is settled he has absolutely nothing to say.

Manager M. Kopp of the Maple mine at Tintic has received a new whim for that property, which will be put into commission at once and will be in operation in a few days. It is a down ninety-eight feet to the depth of 200 feet, at which point it is the present intention to commence shaft-cutting.

George H. Derr left for Nevada yesterday. The gentleman will be joined at the Nevada mine by his wife and children, and together they will go to Tuscarora, inspect the Young America, DeWitt and other properties, and then proceed to Galena of look into its affairs. They will be absent for about a week.

Robert Sterling has returned from a trip to Tintic, where he has been engaged in making some surveys at the Pienle mine. He says it is a fine claim, and that the new discovery of ore in the shaft has widened out to twelve feet. Mr. Sterling said good results are being obtained in the development at the Silver Bow mine.

W. Mossop has resigned the responsible position as he is under a term of years with the Centennial-Eureka Mining company at Tintic, and accepted a more lucrative position with the Vulcan Copper Mining company, operating in western Nevada, under the direction of Superintendent D. D. Dugan, formerly of the Centennial-Eureka mine.

Virginia Enterprise: Following is a copy of the telegram sent to the secretary of the Comstock Pumping association by Manager Ryan yesterday morning: "At 5:30 this morning water was 12 feet 2 inches below 1,500 station. No. 1 elevator running eighteen hours and No. 2 elevator running five hours and thirty minutes."

Last winter there were many disappointed people who could not obtain seats for the Orpheus club concerts. The only way to insure admission to the concerts of the club's third season is to get your name on the lists before they are closed.

**An Enjoyable Tramp.**

**(New York Press.)**

Mildred (female Philadelphia)—You don't seem to like Evelyn.

Penelope (from Boston)—She shows a lack of proper culture. This morning she said she was going to take a tramp up the mountain.

Children—Well?

Penelope—Do you not think she might choose as her companion one whose social status is more fitting with her own?

**Dragon Iron Mine, 21 cars of ore; Bullion-Beck, 10; Swansea, 9; South Swansea, 6; Keystone, 15; Truck Sam, 5; Grand Central, 7; Mammoth, 5; Ajax, 3; Godiva, 2; Sioux, 2; Showers Consolidated, 1; Sunbeam, 1; Sunday Fraction, 1. Total cars, 88.**

**Bullion-Beck, two cars of concentrates; Mammoth mill, one car of concentrates. Total cars, three.**

**Rich Sunday Fraction Ore.**

**(Special Correspondence.)**

Silver, New, 18.—Messrs. De Witt and Lowry, owners of the Sunday Fraction, shipped a car of wonderfully rich copper ore today. The Sunday Fraction lies due north and joins the Rabbit's Foot. Messrs. De Witt and Lowry are the principal owners in the Little Clarissa property, the ground involved in litigation with the Rabbit's Foot. It is rather remarkable that the Sunday Fraction folks have their ore chute at 100 and the grade is still in copper values. Everyone hereabouts wish the industrious owners all sorts of good luck.

Manager McGahan of the Rabbit's Foot might have put out two cars of extremely rich ore this week—in fact, three, if the second-grade is included—but postponed shipping until the coming week. Close sampling of the ore indicates a valuation of close to \$3,000 per car.

**Plant for Black Jack.**

**(Special Correspondence.)**

Robinson, Nov. 18.—After a long wait the boilers for the Black Jack group of claims, owned by Jesse Knight and David Evans, arrived yesterday from Erie, Pa. They are the Geary return tubular pattern, of sixty-horse power, and consist of two boilers. Superintendent Frank Schuyler today had teams and a force of men at work getting them on the hill. It is not known when the boilers will be in position, but it is soon presumed, as that part of the plant was obtained in Salt Lake. Mr. Schuyler said this noon that the Black Jack shaft is now down 210 feet, a short distance below the cave, but the no drifting had been done at that point as erroneously reported. Since caves in both the Mammoth and Ajax invariably indicated the proximity of the ore channel, and frequently contained fine ore bodies, it is likely some drifting may be done from the 200, when it is simply caught up.

**Ore and Bullion.**

Ore and bullion settlements in this city yesterday amounted to \$26,100, as follows: McCormick & Co. Mine, bullion, \$2,700; silver and lead ore, \$5,300; gold bars, \$2,700.

Bamberger & McMillan, ore, \$3,214; T. R. Jones & Co., ore, \$11,500; bullion, \$12,000.

**Metal Market.**

Silver, 53 1/2 cents per ounce. Lead, \$4.40 per 100 pounds. Copper, 15 1/2 cents per pound.

**Mining Notes.**

The Mining Review in its last issue, contained an interesting write-up, with

## WEEK'S STOCK MARKET

**Sales Were Weak and Market Was Unsatisfactory.**

**DAISY'S HEAVY DECLINE**

**PARK CITY STOCKS REMAINED AT FIRM PRICES.**

Sales Aggregated 286,150 Shares, Valued at \$90,659.60—Tintic Stocks Had a Season of Ups and Downs—Saturday's Transactions On the Mining Exchange.

The past week has been one of low prices, and altogether the market was decidedly unsatisfactory. Mercur stocks have all suffered decline, Daisy and Chloride Point have been decidedly off, while Northern Light closed weak. Mercur held up fairly well in the bidding, but passed over without recording sales.

Park City securities held their own. Daisy, West, Daisy and Valco were favorites among buyers, who were forced to pay pretty stiff prices.

Tintic stocks had a season of ups and downs. Yankco Consolidated maintained its strength remarkably well, and Mammoth closed in good tone. Four Aces has dropped nearly out of sight, while Star Consolidated remains at a low point. Grand Central made few changes, while Sunbeam remained in good shape. La Reine was weak, but the stock was held at about \$1 a share. The bidding ranged fairly well in the bidding, but passed over without recording sales.

The sales made during the week on the exchange were as follows:

Shares. Amount.

Monday 4,400 \$7,162.37

Tuesday 7,700 20,287.37

Wednesday 3,500 9,110.00

Thursday 34,128 12,128.00

Friday 60,100 14,602.50

Saturday 21,000 6,957.50

Totals 138,828 \$56,237.60

Yesterday's trading was light, the total being 34,000 shares, going for \$4,955.37. Mammoth opened weak, selling at \$2.85, but closed strong at \$3.00. Showers Consolidated was active around 35, while Daisy was loosened up at 10 1/2 cents. No Four Aces was sold, but it closed with 8 1/2 bid and 8 1/
